For You to Judge.

Thousands of gallons of the L. & M. Paint are produced in one operation by machinery. Only chemically pure color is used. The actual cost of L. & M. is only about \$1.30 per gallon when the job is finished. Will you depend upon this product, or a paint made by costly hand labor in a pot with a stick, producing a few gallons at a time, and at that very likely made with common earth paints, and questionable quality Linseed Oil. The L. & M. Paint is sold by G. C. Livingston & Co., Starke, and Melver & McKay, Ocala.

Interesting Facts to Smokers.

Do you know that in Cuba, to test Havana tobacco, the leaf is rolled into a cigar and lighted to get the taste, then the light is permitted to go out and the cigar is again lighted, and if the taste is rank and bitter the tobacco is graded as inferior quality. Palm Smokers are always sweet after relighting.

Do you know that you cannot get finer Havana tobacco in any cigar at a price than that which is in a Palm Smoker?

Do you know that Palm Smokers are made by Cuban hand workmen? Every cigar will burn even and draw free—not like cigars that are made in molds.

Do you know that Palm Smokers cost dealers more than any other 50 cigar? That is because they are worth a great deal more.

Do you know that the wrapper and filler of a Palm Smoker comes from the famous Vuelta Abajo district of Cuba, and that the same grade of tobacco is used in the finest brands of imported cigars?

Do you know that if you have not smoked a Palm Smoker, that you have not smoked the best?

Do you know that a Palm Smoker has that smooth, rich taste that is so much sought in high grade Havana cigars?

Do you know that substitutes may look the same as Palm Smokers, but they will not taste the same? Insist upon getting a Palm Smoker, then you know you are getting the best that money will buy.

The price of Palm Smokers is 5c and are for sale at all first-class dealers.
